EVENT PRODUCTS

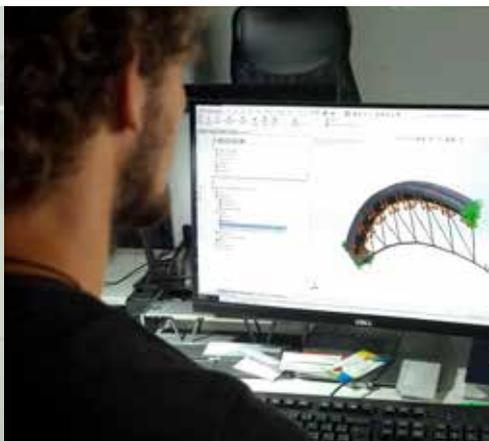

ABOUT US

At ZEPELIN, we design, develop, and manufacture all of our products under one roof. With over 20 years of experience, we make the world's finest inflatable products. We use only the highest quality materials and the most advanced technologies to produce our products.

All products are made in our own high-tech factory by a large team of people who love their work. We are constantly investing in new technologies, which help us keep the quality of our products at the highest level and at the lowest cost to our clients. With our in-house engineering team, we are constantly working on improving our products and developing the next generation of solutions throughout all of our brands.

We are committed to excellent customer service through a network of authorized experts available worldwide from our distributors. We offer a variety of warranty and after-warranty services on our products.

TENTS

the widest range
of inflatable
event tents

SMART INFLATION SYSTEM

The patented one-way central inflation system provides the luxury of one-point inflation with perfect control of inflation from chamber to chamber. It also allows easy detection of any potential air leak. The smart inflation system is now included in most AXION models.

EXTREME SAFETY

In comparison to metal structure tents, there are no dangerous rigid components with AXION inflatables. Compared to old-fashioned inflatable tents with a permanent blower, sealed inflatable tents (also called pneumatic tents) are independent of the power grid. They do not require continuous inflation. AXION is one of the safest pneumatic tents on the market. Tested for up to 100 km/h (62 mph) and certified for 60 km/h (37 mph), our inflatable tents can withstand the most extreme weather conditions. The structures are very flexible and will keep those in the tent safe during strong winds. AXION is designed to bend and twist with the wind and then return to its original shape.

HIGH QUALITY TPU SEALED TUBES

All AXION tents use 250-micron seamless TPU bladder tubes, finished using HF welding technologies. All bladders are housed in strong 500D HT polyester, so the whole inflatable structure is rigid but still flexible across a wide temperature range, from cold FIS SKI events to the hot DAKAR RALLY.

FULLY SERVICEABLE BY USER

Sometimes, you get some damage at the moment when you need your tent up. If there is ever damage to your tent, a repair kit is available for all AXION models. Thanks to the zip-off roof and the central tube connector, any user can change the inflatable tube onsite within a few minutes without having to send the tent out for service!

MODULARITY

All sizes of each AXION model can be connected together by a tunnel, so a tent village can be created. Moreover, some sizes of different AXION models can be interconnected by tunnels too. Build an even bigger event with easy-to-use AXION inflatables.

REVERSIBLE WALLS

All walls are reversible. You can also get double walls with an opaque layer inside, panorama walls, section walls, and more.

EASY TRANSPORT

Packed in an original trolley bag, each AXION tent can be easily transported in any car. This is a great advantage of inflatable tents compared to metal tents.

EASY

Basic model of a promotional inflatable tent

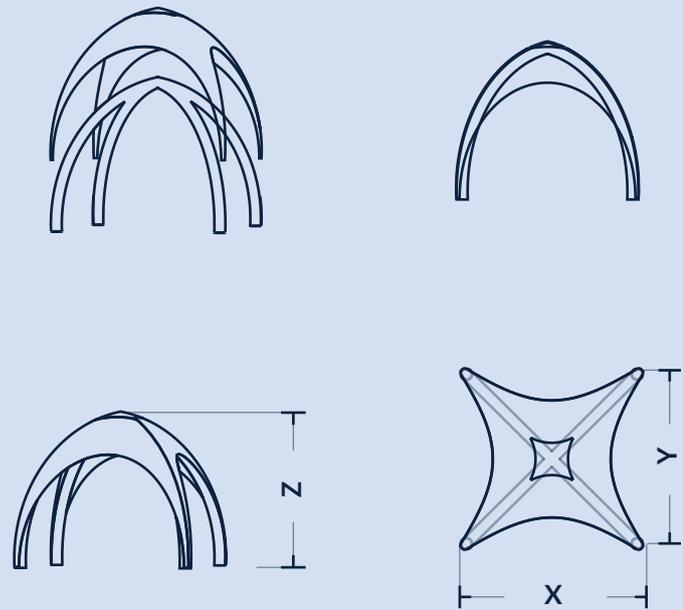

CONCEPT

AXION Easy is a high-quality inflatable tent with a simplified structure, respecting the financial limits of our clients. Even with a limited budget, it provides them the opportunity to use a quality brand inflatable tent, made in the EU, without compromises.

The EASY model is a simple concept of four independent inflatable legs forming a roof with space for four artworks to be printed by sublimation printing without color limits. Similar to other AXION models, there is the option to use different branded roofs with one structure, easily changeable using zip-off technology for better promotion. The zip-off cover, walls, visors, and the entire inflatable structure can be printed in full-color dye sublimation upon demand.

LITE

High-quality
inflatable
promotional tent
for every budget

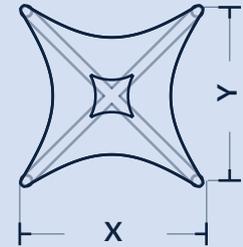

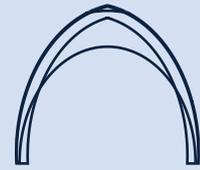

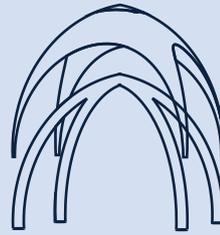

CONCEPT

The mission in creating AXION Lite was to provide easy, budget-friendly, but high-quality inflatable promotional tents to the market. The LITE model is easy to use, with four sealed inflatable legs conveniently forming a roof with space for branding on all four sides. Digital sublimation printing allows for printing without limits. The LITE features easily changeable zip-off roofs so you can quickly change the branding for various promotional uses with one structure. The zip-off roof, walls, visors, and the entire inflatable structure can be brilliantly printed in full color upon demand.

HANDLING and SET UP

The AXION Lite is made of strong but lightweight polyester fabric. Using our patented AXION smart inflation system (which controls the airflow using the central valve system), the LITE model requires only one person to set it up within minutes. The entire tent packs down into the original trolley bag that fits into any standard-sized car, making it perfect for transportation to any event.

SQUARE

Sealed inflatable event tent using horizontal inflatable beams

CONCEPT

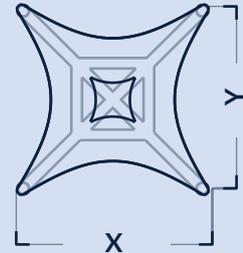

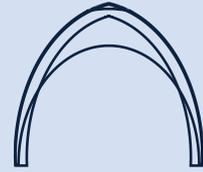

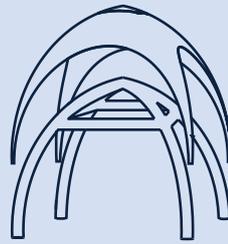

AXION Square is the first member of the AXION family and was developed in 2010. Features of the AXION development, like the horizontal stabilization inflatable beams, the central tube connector, the zip-off roof, and its availability in four sizes, make it one of the most reliable inflatable event tents on the market.

AXION Square features easily changeable zip-off technology so that brand managers can quickly change the branding for various promotional uses with one structure. The zip-off roof (cover), walls, visors, and the entire inflatable structure can be printed in full-color dye sublimation upon demand.

WEATHER RESISTANCE

AXION Square is proven to withstand winds up to 62 mph (100 km/h), ranking the AXION product as one of the most durable and safest inflatable tents on the market.

TRIPOD

an open space
inflatable
shade for car
promotion

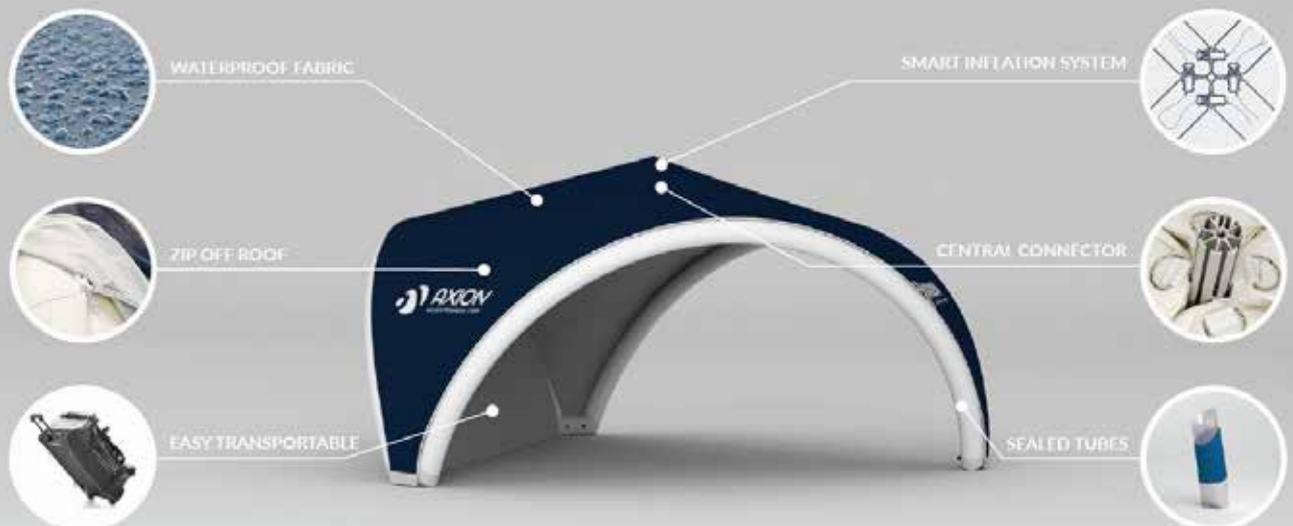

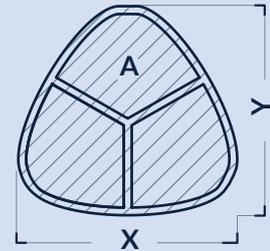

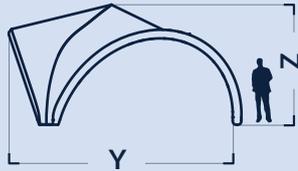

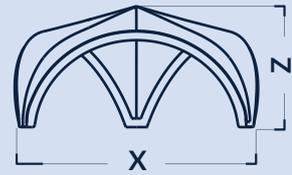

CONCEPT - AXION Tripod is a great concept for both indoor and outdoor events as an inflatable podium cover, promotional tent, or stylish sun shelter. A zip-off roof and side walls can be sublimation printed. Enjoy its innovative shape and airy, attractive design.

COVER AREA - The canopy of the AXION Tripod shelter is made of water-resistant fabric, so there is no need to add a waterproof layer in case of rain. Thanks to the innovative design of the sloped side walls, the efficient usage area is much larger. There is no need to use additional visors, as the internal space is unaffected by rain or sun. Moreover, it is possible to connect multiple TRIPODs together by tunnels, creating an extraordinary tent village.

HANDLING - As with our other AXION pneumatic tents, handling is very easy. The TRIPOD is packed into a trolley bag and is easily transportable in any vehicle. One person can easily transport and set up the AXION Tripod. It inflates within minutes with one valve using our patented AXION smart inflation system.

SERVICE - Thanks to the zip-off roof and the central tube connector, any user can change the inner bladder or the entire inflatable arch onsite within a few minutes, without having to send the tent out for service!

	tripod 5	tripod 6	tripod 7	tripod 8	tripod 9

HEXA

A wide open-space hexagonal inflatable tent

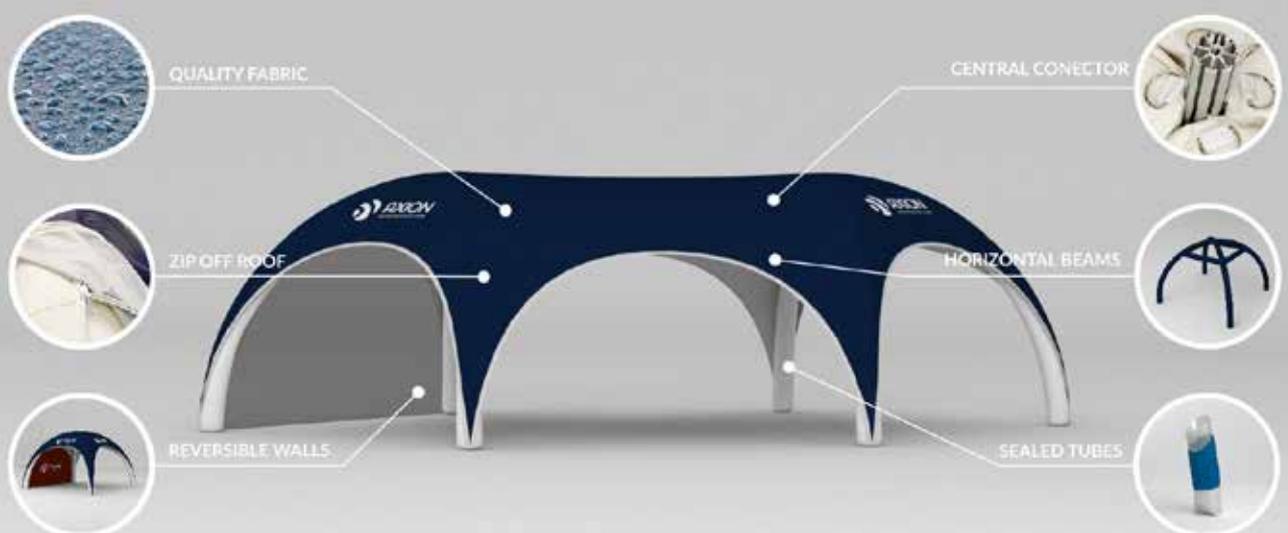

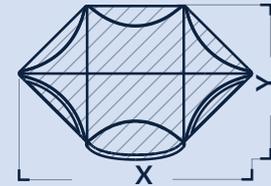

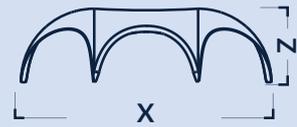

CONCEPT

With the AXION Hexa, the primary idea was to offer greater presence, with wider space inside and maximum access for all those who do not wish to connect two tents together with a connection tunnel. AXION Hexa meets this task perfectly, without creating a funnel in the middle of the interior space. Similar to the AXION Square model, AXION Hexa is equipped with horizontal beams to provide better side stability and inflation for the structure, creating a tremendous presence for your events.

COVER AREA, HANDLING and SET UP

The AXION Hexa offers maximum space and brand visibility, covering up to 56 m². Even so, it is easy for two people to set up and install within minutes. The entire tent packs down into the original trolley bag that fits into any standard-sized vehicle, making it perfect for any event or festival.

	hexa44	hexa55

flame retardancy	B1 (DIN 4102-1)	

CUBE

An exciting new pure-form inflatable event structure

CONCEPT

The AXION Cube is a solution for all those fed up with traditional inflatable or pop-up tents. Thanks to a unique hidden water drain, the roof can stay optically flat but will work perfectly outdoors in any rain conditions. As with all AXION products, there is no need for a permanent power supply!

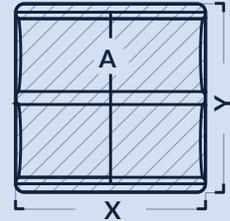

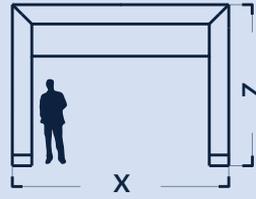

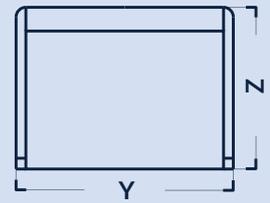

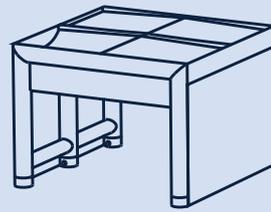

DESIGN

The AXION Cube is a unique inflatable tent designed in a modern cube style. Different from any other inflatable tents, it offers straight vertical panels for your brand.

HANDLING and SET UP

The AXION Cube is made of strong but lightweight polyester fabric. Installation requires just one person, and the Cube can be set up in minutes. The entire tent packs down into the original trolley bag that fits into any standard-sized vehicle, making it perfect for transportation to marketing events and festivals.

CUBE LITE

modern inflatable tent with unique shape and structure

CONCEPT

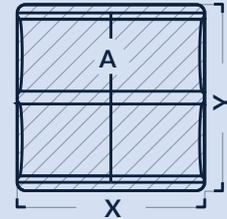

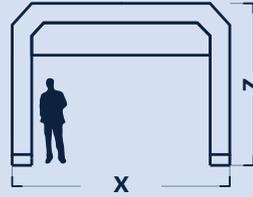

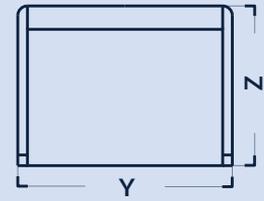

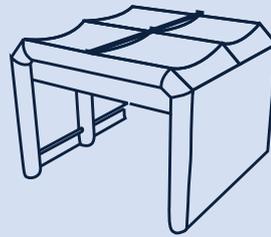

The mission to create AXION Cube Lite was to provide simple, budget friendly, but high quality modern tent with cube shape for each kind of event.

Cube Lite tent is available in the most popular size 4x4 m in all standard colors. Due to used separated tubes and aluminum spacer bars instead of connected inflatable beams, structure is very simple and therefore user friendly. Despite of this fact, tent is still inflatable at the same time (not gradually) due to special triple hose which is scope of delivery.

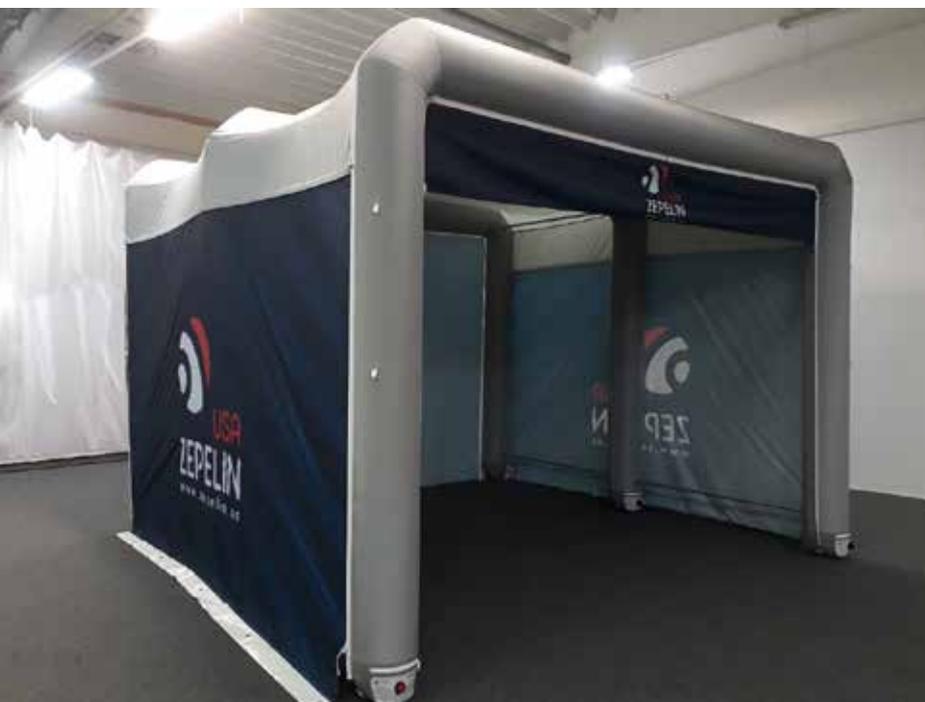

HANDLING and SET UP

The AXION Cube is made of strong, but lightweight polyester fabric. Installation requires just one person and the Cube can be set up in minutes. The entire tent packs down into the original trolley bag, that fits into any standard sized vehicle, making it perfect for transportation to marketing events and festivals.

flame retardancy	B1 (DIN 4102-1)

POD

Tunnel tent with a wide range of applications

CONCEPT

This project was created thanks to the constant requests of our clients for a quality inflatable tent in the shape of a “tunnel” and also for a tent with a rectangular ground plan. This was a challenge, and AXION Pod was born.

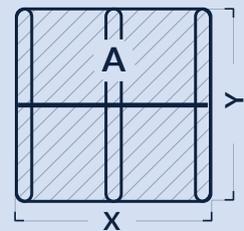

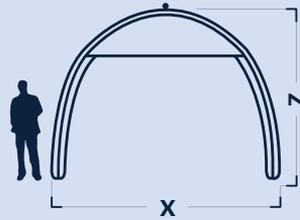

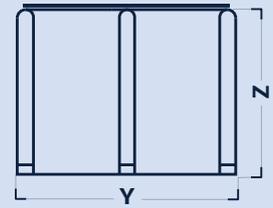

Of course, several design options were added to create a tent with wide applications such as an event tent, temporary car shelter, technical background for promo showrooms, exhibitions, sports events, schools, and much more.

DESIGN

As with the AXION Cube Lite, the Pod tent uses separate beams and aluminium spacers instead of connected inflatable beams, making the design very subtle, attractive, and user-friendly. Inflation with a triple or quad tube (depending on the type of tent) is a matter of course, and this equipment is automatically included in the scope of delivery.

The AXION Pod is available in three basic sizes with a square base and their extended versions that have a rectangular base.

	Pod 35-35	Pod 35-50	Pod 40-40	Pod 40-60	Pod 50-50	Pod 50-75

SPIDER

Increase your event space with a spider dome

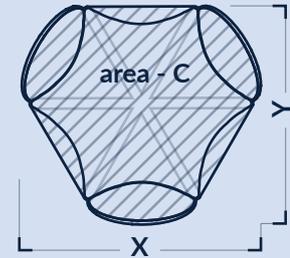

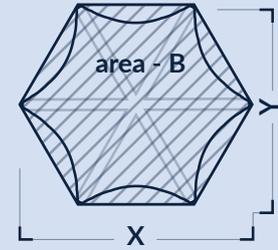

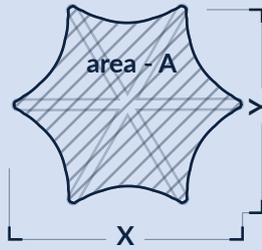

CONCEPT - Based on the traditional spider inflatable dome concept, AXION Spider is the combination of a big hexagonal-shaped dome and the unique AXION system of sealed structures. AXION Spider provides a large event space and increased height for enhanced brand visibility. Additionally, it is the only spider tent on the market available with inflatable visors. All of this without the necessity of a permanent power supply

COVER AREA - AXION Spider is ideal for large events looking for a contemporary and unique design. It offers a floor space area of 42 m² up to 80 m². It is available in a range of sizes and options, including zip-off reversible walls, optional visors, and branding that will help maximize your event presence. The AXION Spider 10m with 3 visors creates an event space of 74 m², providing a contemporary solution that also conforms with legal requirements in most countries (there is typically no need for local event or building permits).

HANDLING and SET UP - AXION Spider is made of strong but lightweight polyester fabric with contoured legs. Using our AXION smart inflation system (which controls the airflow using the central valve system), the Spider requires no more than two people to set up and will take less than 20 minutes to assemble. The entire dome packs down into a compact carry bag that fits into any standard-sized vehicle, making it perfect for transportation to marketing events and festivals.

SHAPE

Sealed inflatable event shapes

INTERNAL ILLUMINATION

Take the opportunity to brighten your next event using internal illumination with AXION products. Both 230V plug-in and 12V portable systems are available in white or RGB versions.

Thanks to the use of modern flat LED sources connected to compact click-in Li-Ion batteries, the illumination of AXION products is easy and effective for any night event.

FULLY SERVICEABLE BY USER

It happens. Usually, you get some damage at the moment when you need your product up. If there is ever damage done to your Shape object, a repair kit is available for all AXION models. Thanks to the easy zip-in system, any user can repair or change the inflatable tube onsite within a few minutes without having to send the object out for service!

HIGH QUALITY TPU SEALED TUBES

All AXION tents use 250-micron seamless TPU bladder tubes finished using HF welding technologies. All bladders are accommodated in strong 500D HT polyester, so the whole inflatable structure is rigid but still flexible in a wide temperature range—from cold FIS SKI events to the hot DAKAR RALLY.

COLORS WITHOUT LIMITS

For AXION Shape objects, we use the newest technologies of dye sublimation printing, automatic cutting, and welding, so each object can have a different full-color design in high-resolution photo quality.

The printed cover/sleeve can be easily zipped off and changed for different designs without unnecessary investment to create a brand new look and product.

SMART INFLATION SYSTEM

Standard inflatable arches are fully dependent on the power source. In case of a power outage, an unpleasant or even dangerous situation can occur. Sealed AXION Arches are independent of power and more weather-stable as they are inflated to higher pressure.

For double safety, each arch can be equipped with an automatic pressure control system.

EXTREME STABILITY

A ballast weight plate, a ballast weight bag, or even their combination can be used as an accessory for any AXION Shape products. The ballast weighting systems create extreme stability, so the inflatable object can be balanced at extreme

angles. Securing and stabilizing your inflatable objects at your events will no longer be a problem.

EASY TRANSPORT

The base of each AXION Shape object works as a transport bag. Just deflate the object and zip on the top part. You will enjoy similarly easy packing with AXION Arch products, where you just zip two bases together to get one compact disc.

Simple and practical, just like the whole AXION philosophy.

ANGLED ARCH

angled shape

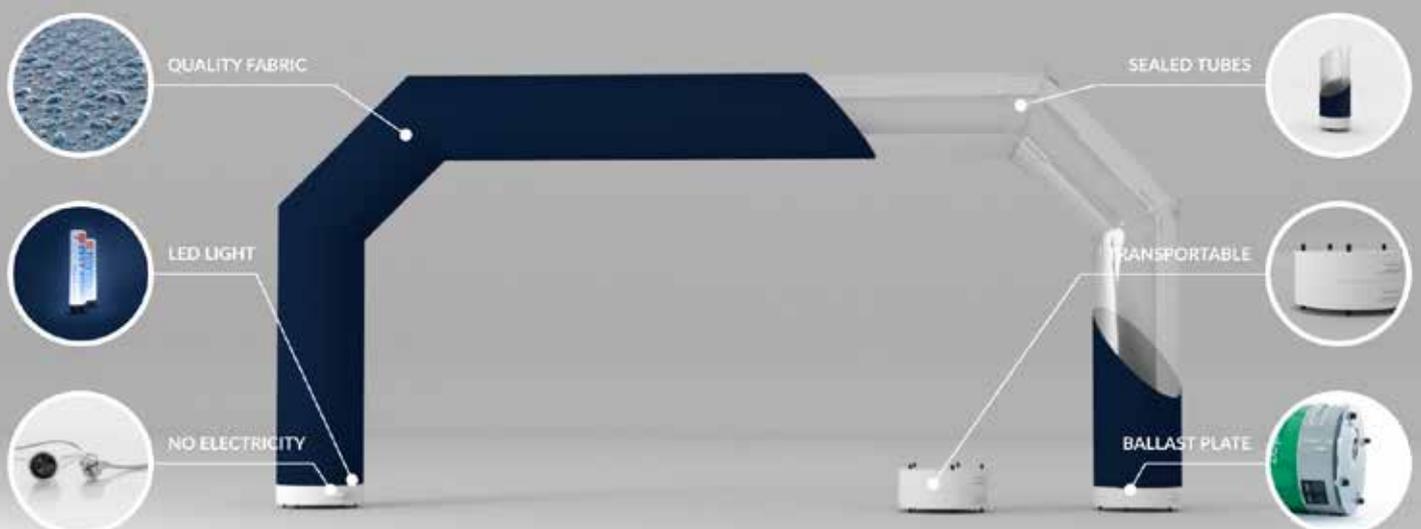

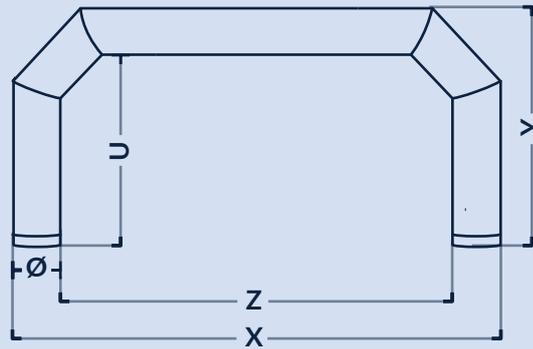

AXION inflatable arches are slimmer than traditional arches due to their higher internal pressure. They offer better weather resistance, better stability, no risk of collapse, and no noise from blowers (continuous inflation). Customers choose AXION Inflatable Arches for their easy installation and safety in use.

The AXION Angled inflatable arch is the most common arch shape for sporting events, offering ample space for branding. The AXION pneumatic arch is an alternative to the angled shape, already well-tested in hundreds of events across many countries worldwide.

NEW - 3D BUTTON

For those who need to present their logo strongly or just want to have something unique, there is a possibility to design and produce an arch with a pneumatic button. This feature turns your arch into something special, with a 3D pneumatic button.

RECTANGULAR ARCH

rectangle shape

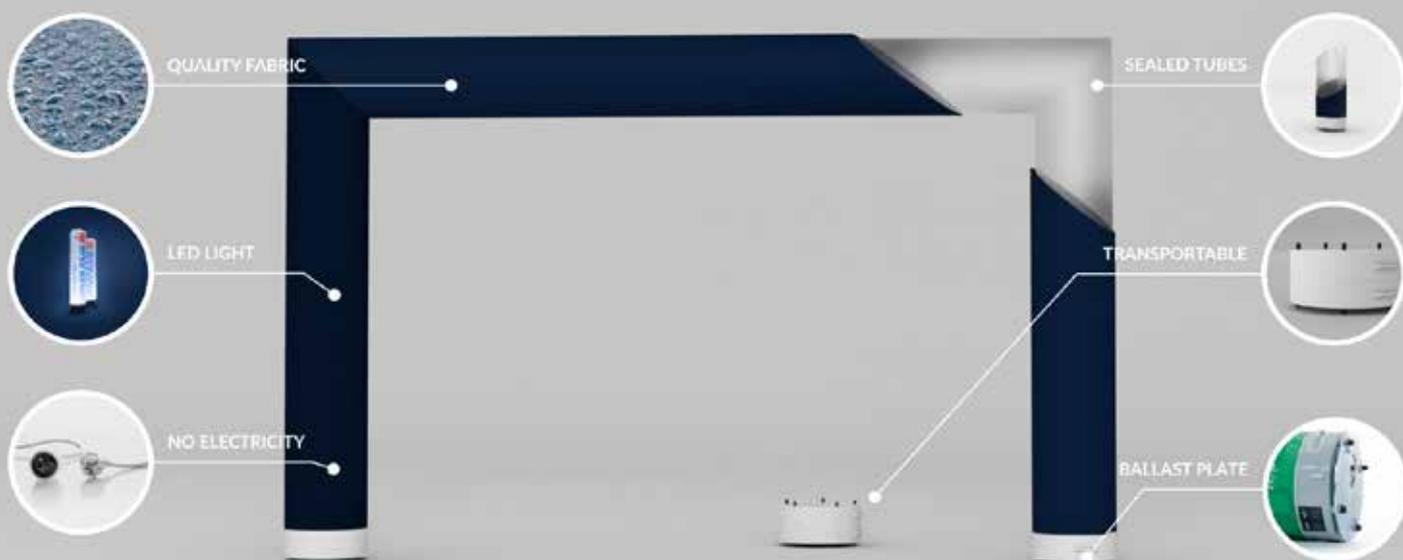

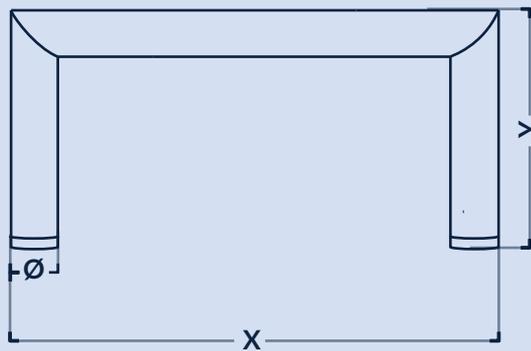

Elevate Your Event with Our RECTANGULAR Inflatable Arch!

Our RECTANGULAR inflatable arch is the perfect centerpiece for any sports event, offering a sleek and modern design that maximizes brand visibility. The rectangular shape provides a broad, flat surface ideal for showcasing logos and messages, ensuring your brand stands out.

With its higher internal pressure, our RECTANGULAR inflatable arch stands out for its slim profile, superior weather resistance, and exceptional stability. Say goodbye to collapse risks and blower noise, and hello to a seamless, professional look that enhances your event's atmosphere.

Make a lasting impression with a customizable arch that showcases your brand in the best light. Whether it's a marathon, cycling race, or any outdoor event, our arch ensures your brand gets the attention it deserves.

ROUNDED ARCH

rounded shape

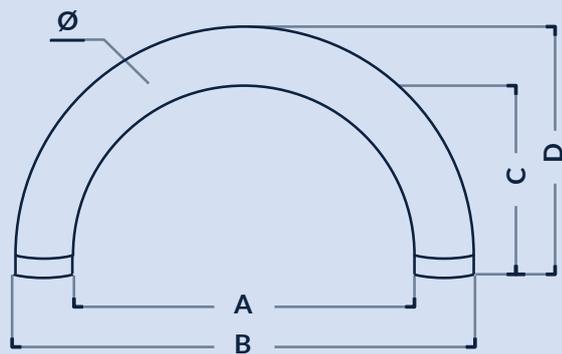

AXION pneumatic arches are slimmer than traditional arches due to their higher internal pressure. They offer better weather resistance, improved stability, no risk of collapse, and no noise from blowers (continuous inflation). Most of our customers choose AXION arches for their easy installation and safe use.

Due to the more challenging artwork application, AXION inflatable rounded arches are mainly used when the artwork and graphics better suit this shape of arch. The AXION round arch provides an attractive gate and entranceway to your sporting events and festivals.

NEW - ARR-HP

We are launching a new, extremely safe inflatable arch model with a high-pressure support tube. In the event of an accident, the arch will not fall but will remain supported by the tube. The space under the arch will remain passable.

ZIP-OFF ARCH

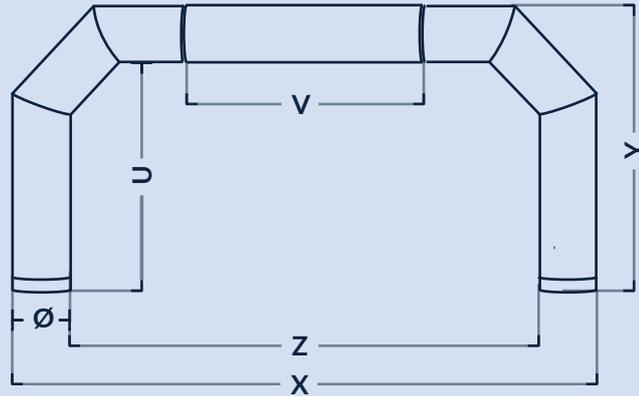

Multifunctional arch with detachable horizontal beam

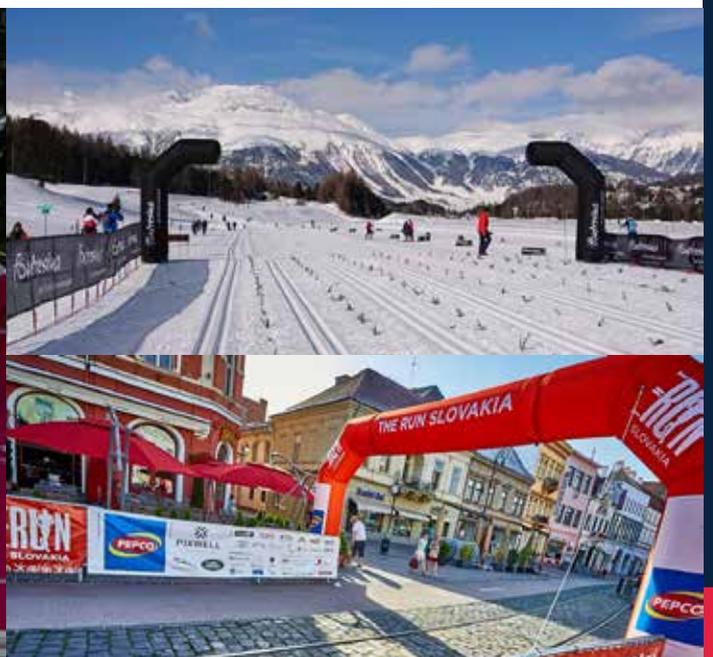

AXION Inflatable Arches are slimmer than traditional arches due to their higher internal pressure. They offer better weather resistance, improved stability, no risk of collapse, and no noise from blowers (continuous inflation). Customers are choosing AXION Inflatable Arches for their easy installation and safety in use.

The AXION Zip-off Arch is a unique solution for those using an arch at festivals and events, as well as at venues where organizers do not allow full arches for security reasons. A horizontal beam can be detached and used separately as a vertical or horizontal tube, while the vertical corners function well as half-arches. This gives event organizers more flexibility and creativity with their inflatable arches.

TUBE

Simple and
versatile
inflatable tube

AXION inflatable tubes are slimmer and more stable than traditional inflatable tubes due to their higher internal pressure. They offer better weather resistance, improved stability, and no noise from blowers. Most customers choose AXION Tubes for their easy installation and safety in use.

AXION inflatable tubes are available in many sizes to create a towering brand presence. They also feature versatility and variety with the option of a simple removable zip-off sleeve/cover, allowing you to change your branding quickly and easily. Customers also appreciate the internal illumination of the AXION inflatable tubes for brighter nighttime event marketing. The inflatable tubes are stable and sturdy, including the option of a weighted ballast plate. AXION Tube is a simple and reliable product.

CAN

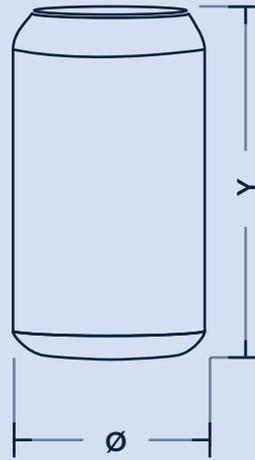

Show off your
canned drink in
its real shape

The AXION Inflatable Can follows the same principle as an AXION Tube but is shaped like a can. It is a sealed inflatable with an internal bladder and higher internal pressure than other traditional inflatable shapes. It offers better weather resistance, improved stability, and no blower noise.

AXION Cans are available in many sizes and custom shapes. Customers also appreciate the option to “brighten” their display with the internal illumination system that lights up the inflatable can. The inflatable cans are stable and sturdy, including the option of a weighted ballast plate. AXION Cans are a simple, reliable, and effective product.

BOTTLE

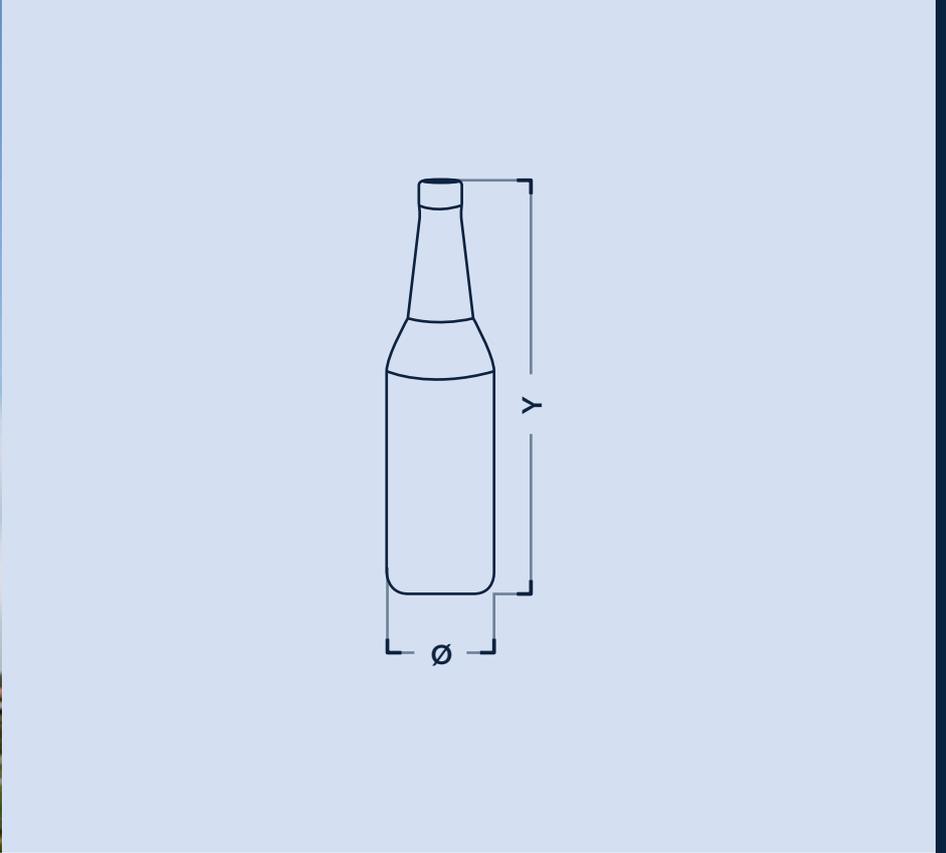

Show off your bottled drink in its real shape

The AXION Inflatable Bottle follows the same principle as an AXION Tube but is shaped like a bottle. It is a sealed inflatable with an internal bladder and higher internal pressure than other traditional inflatable shapes. It offers better weather resistance, improved stability, and no blower noise.

AXION Bottles are available in many sizes and custom shapes. Customers also appreciate the option to “brighten” their display with the internal illumination system that lights up the inflatable bottle. The inflatable bottles are stable and sturdy, including the option of a weighted ballast plate. AXION Bottles are a simple, reliable, and effective product.

BLOCK

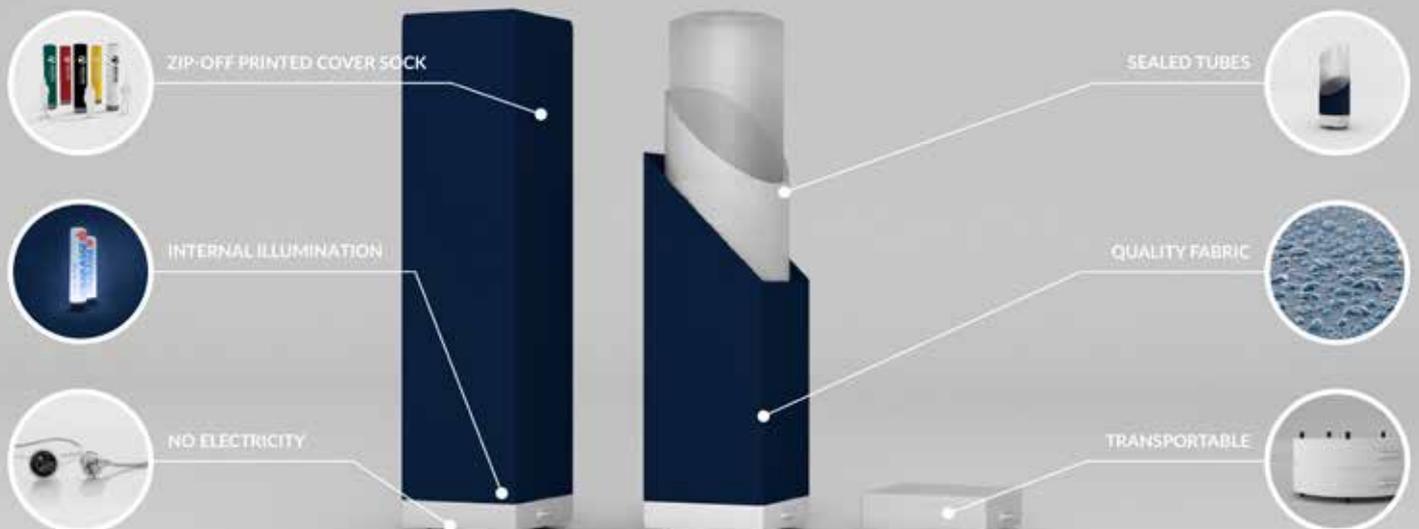

Square inflatable object

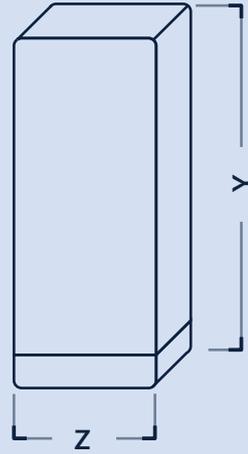

AXION Block inflatable objects provide a large, optimal style and maximum surface area to promote your branding and artwork. Blocks are designed for customers who want a new look for their events and festivals, differing from traditional inflatable shapes. They highlight your message in a very attractive and visible manner, better promoting your product or brand.

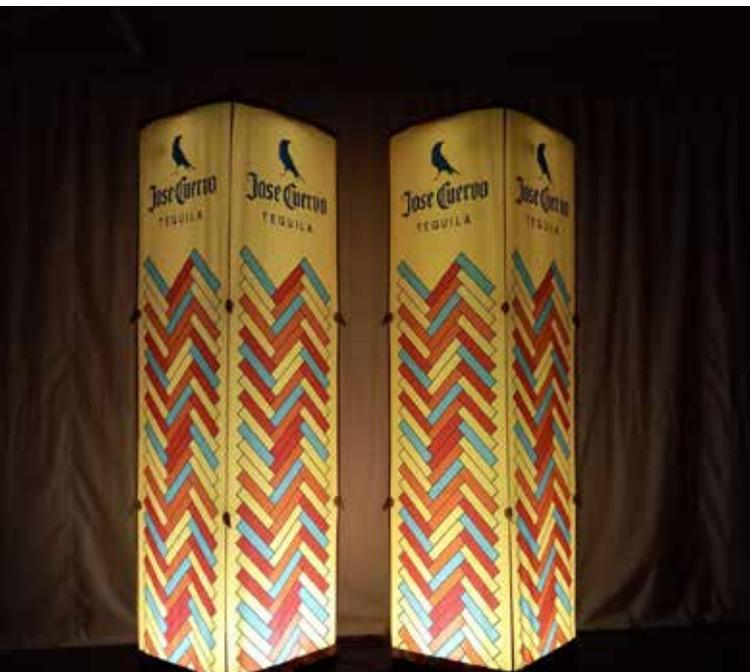

Block is available in two versions. The Standard Block has a ribbed bladder inside, while the Block Lite version has a tubular bladder inside.

AXION Inflatable Blocks are available in many sizes, from 2.5 m to 4.0 m in height, and feature a simple, easy-to-use, replaceable zip-off sleeve/cover, so your branding can be changed in minutes. As with other AXION Shape products, the AXION inflatable Blocks are durable and stable, including the use of an optional weighted ballast plate.

WALL

Slim but rigid
inflatable
billboard

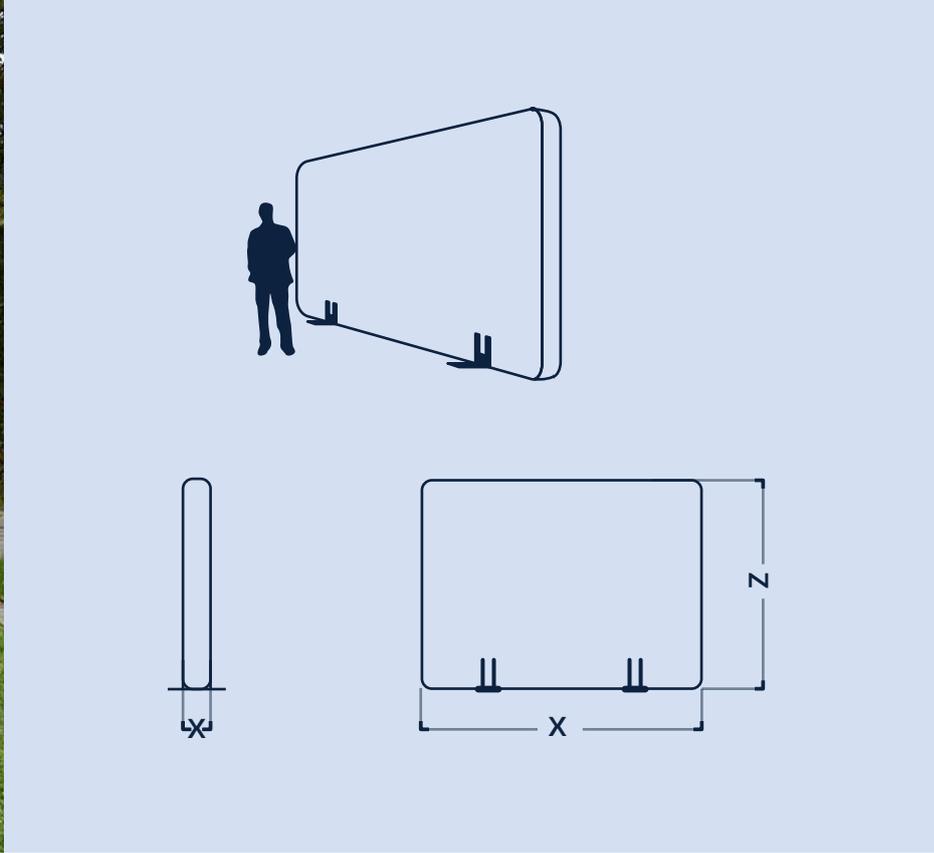

AXION Wall combines the advantages of a popup display with sealed inflatable technology, making it suitable for both indoor and outdoor use. Using drop stitch fabric technology with high internal pressure, and after proper anchoring, it can withstand the same wind forces as heavy-duty solid displays. Additionally, it offers safe use due to its inflatable nature.

For indoor use, there are attractive laser-cut feet available, making the whole wall self-standing without the noise of a fan. As an option, LED lights can be installed along the top edge of the wall.

The wall is available in three size variants with fully dye-sublimation printed "socks" or banners. It is possible to save money by using different "socks" on a single wall. This product is perfectly suitable for all kinds of advertising or sporting events, serving as an inflatable billboard, sponsor wall, or photoshoot wall.

FLOAT

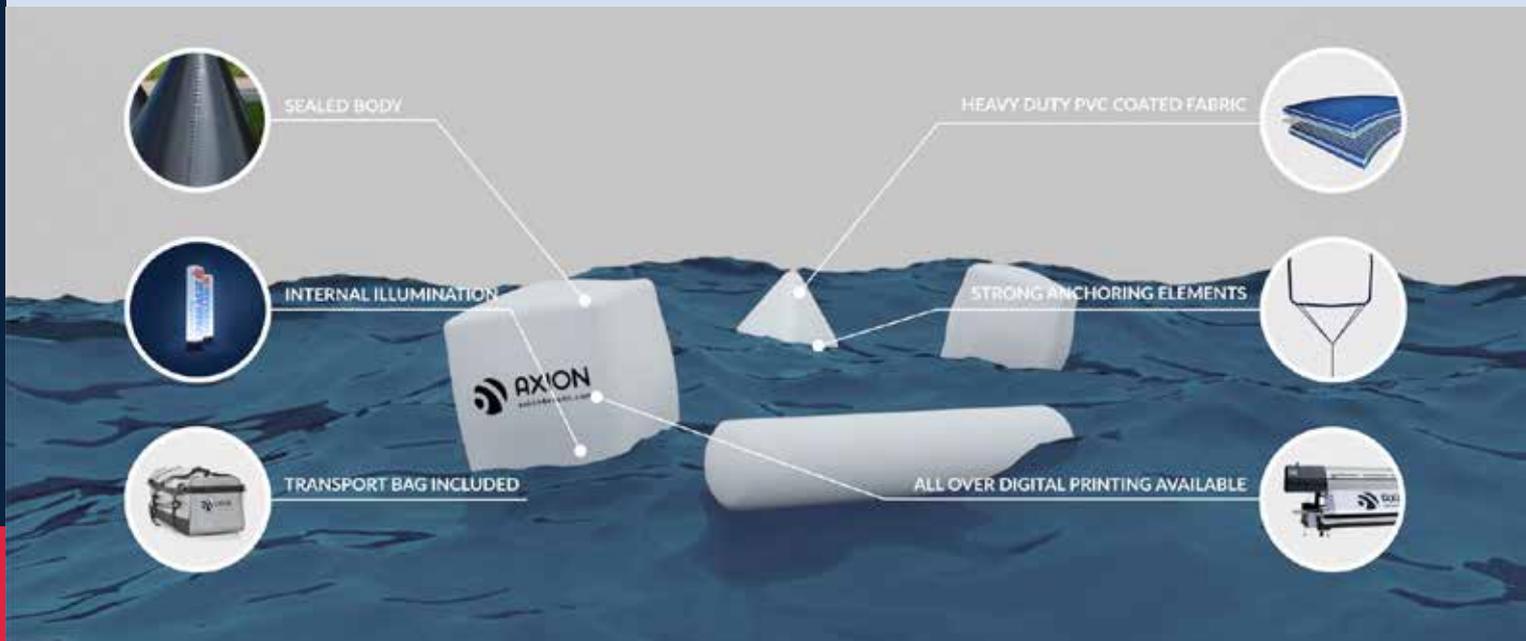

Inflatable buoys for water sports and promotions

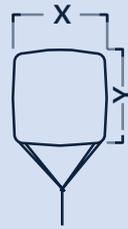

AXION Float inflatable buoys are a special product category among AXION products due to their specific purpose for use on the water. With AXION Float, you can choose from a variety of different shapes and sizes of high-quality sealed buoys to elevate your branding at all water sports events, including triathlons, water skiing, wakeboarding, swimming, yachting, and boating competitions.

AXION Float inflatable buoys come in many popular shapes such as cube, cylinder, pyramid, cone, and tube.

AXION Float buoys are made of heavy-duty PVC-coated fabric for durability, with all-over printing to ensure your logo is visible to all.

FURNITURE

Inflatable event furniture

INTERNAL ILLUMINATION

Take the opportunity to use internal illumination in the Bistro or Bongo inflatable table. Both 230V plug and 12V unplug systems are available in white or RGB versions. Thanks to modern flat LED sources connected to compact click-in Li-Ion batteries, the illumination of AXION products is easy to use and effective for any night event.

INFLATABLE EVENT FURNITURE

AXION Furniture is a great accessory to complete your inflatable event set. Our set of inflatable furniture includes donut seating, puff seating, tables, and desks in different shapes and combinations. It is light and easy to transport, yet very stable after inflation. The complete installation of your lounge or event furniture set takes just minutes. On top of that, each AXION Furniture product is printed with sublimation technology, eliminating any risk of scratching. Make your event more friendly, comfortable, and noticeable with AXION Furniture.

HIGH QUALITY TPU SEALED TUBES

All AXION products use 250-micron seamless TPU bladder tubes sealed with HF welding technology. All bladders are housed in strong 500D HT polyester, making the entire inflatable structure rigid yet still flexible across a wide temperature range, from cold FIS Ski events to the hot Dakar Rally.

COLORS WITHOUT LIMITS

For AXION Furniture, we use the newest technologies for dye sublimation printing, automatic cutting, and welding, so each object can have a different full-color design in photo quality. The printed “sock” cover can be easily zipped off and changed for a different design without unnecessary investment in a completely new product.

STABILITY

A ballast weight plate, a ballast weight bag, or even both in combination can be used as support for the Bistro or Bongo table. The result is extreme stability. Stabilizing your inflatable objects at your events will no longer be a problem.

EASY TRANSPORT

The transport of event furniture used to be problematic, but not so with AXION inflatable furniture. Each product is packed into a disc shape and fits into a compact, lightweight bag for easy transport. AXION furniture for your entire event can easily be transported in a small car or vehicle, in addition to other AXION inflatable products already loaded in the same vehicle! Easy to transport. Easy to set up!

ACRYLIC GLASS TOP COVER

Acrylic glass top cover – a very nice and useful addition, especially for showrooms. We don't recommend it for frequent events, as there is a risk of scratching or breaking.

TABLE

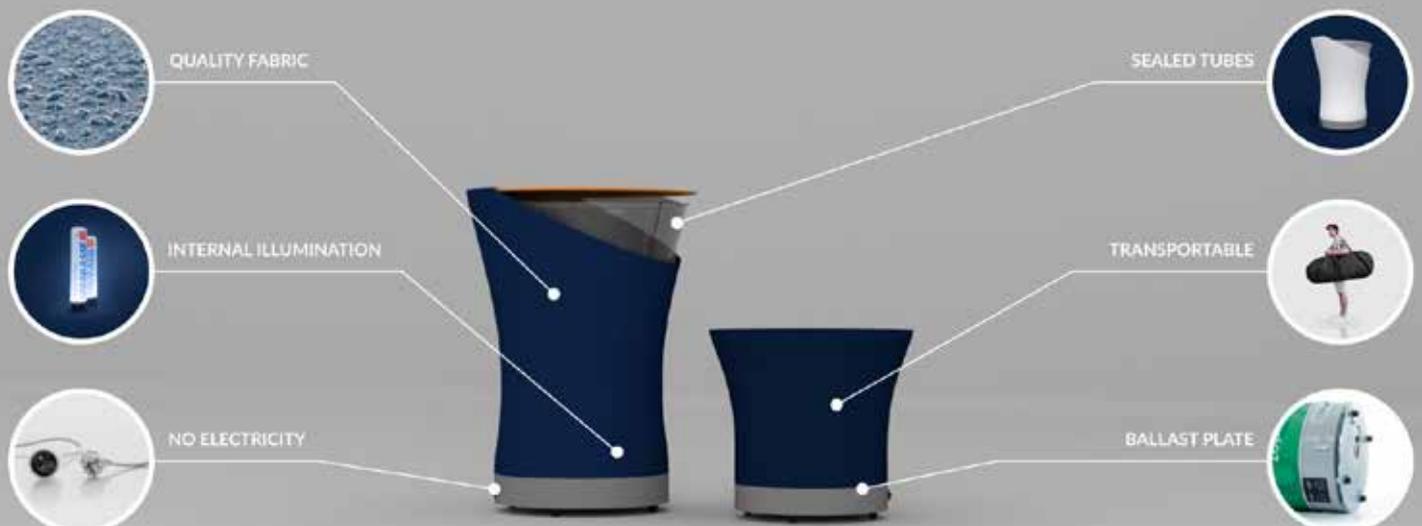

A simple and reliable inflatable table for every event

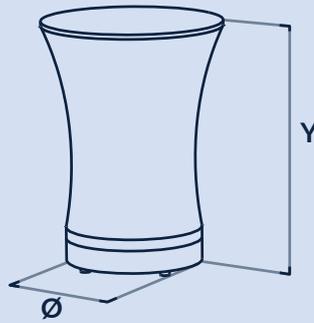

Sand-glass shaped inflatable tables are great to be used on their own or to be combined with the Omega inflatable seat. When folded, the table is a portable disc shape with a diameter of only 80cm and a height of 12cm, weighing only 14kg in the carry bag. Setup is easy; in just a minute, you will have a perfect promotion or catering table. The inflatable body is air-sealed. No permanent fan is needed after inflation.

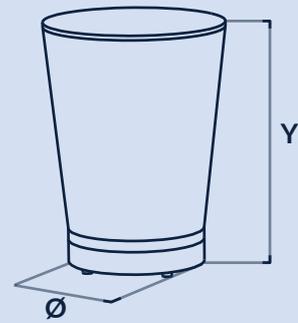

The AXION inflatable tables are well pressurized and more stable than any others on the market. An optional steel ballast weight plate is available for outdoor events, and an internal LED illumination light creates a special atmosphere while highlighting your printed logo on the table. The AXION table is a simple and reliable product for each event.

There are two models available – the BISTRO model is 110cm tall, great for standing; the BONGO model is 72cm tall, ideal for use in combination with the Omega seat.

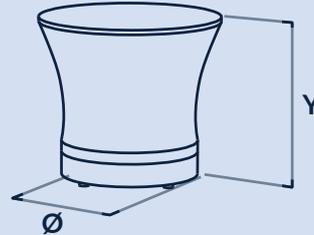

BISTRO TABLE

DESK

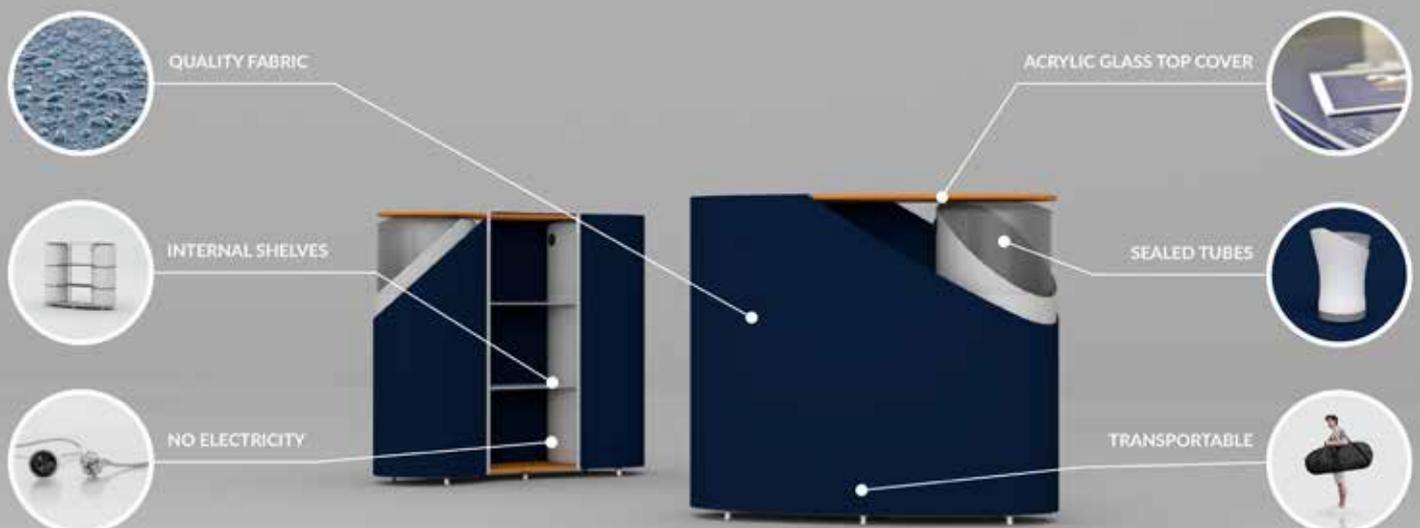

Straight or
bended

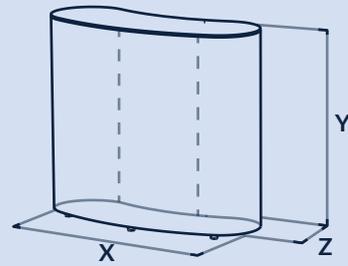

AXION Desk is an excellent product for point-of-sale campaigns, sampling programs, and information kiosks. It comes with an easy-to-use transport bag that is compact in size and weighs only 14kg. One person can inflate the two tubes within 5 minutes, resulting in a great, fully functional desk with a solid top and bottom. Inflatable tubes are air-sealed, and a permanent fan is not needed after inflation.

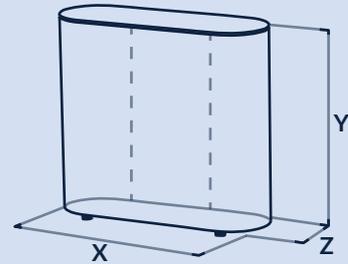

You have the flexibility to place two shelves in between the inflatable tubes, as well as add a white or RGB light to illuminate it from the inside. The entire surface area of the desk can be printed in full-color dye sublimation upon demand.

There are two models available - BENDED desk or STRAIGHT desk. Just choose one that fits your needs.

SEAT

Inflatable seat
for individuals or
groups

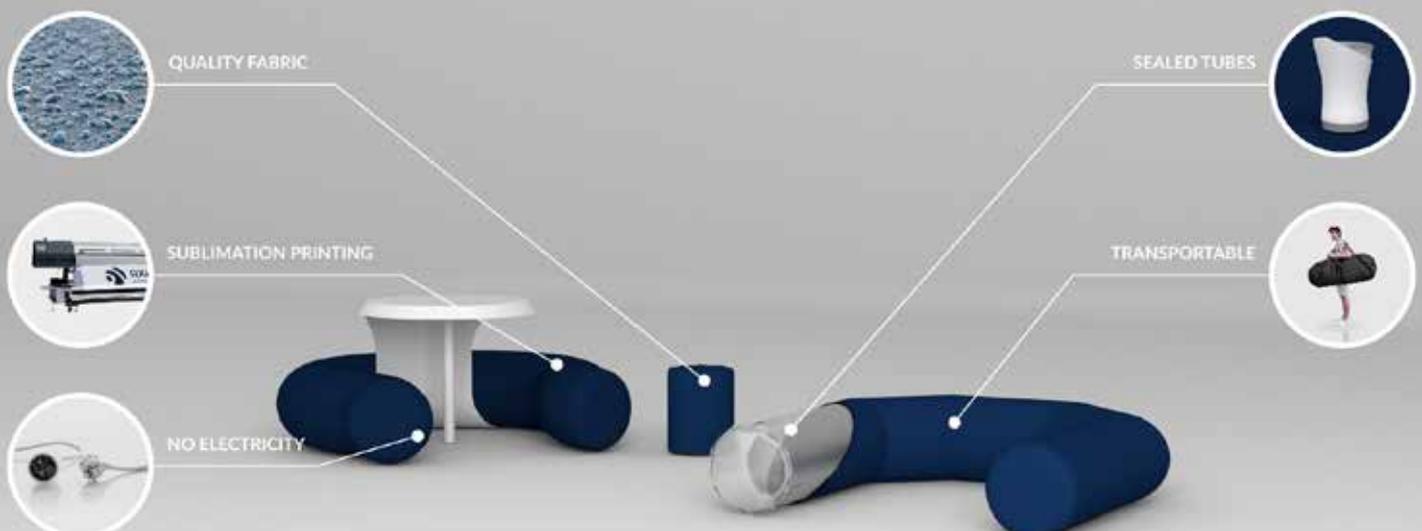

A standard set of chairs and tables will not easily fit into a regular-sized vehicle. The AXION Seat easily solves this problem for your event marketing and client entertaining needs.

You can choose from different kinds – the YOU seat, the OMEGA seat, or the PUFF. YOU and OMEGA are “donut” type seats designed for more seating and to be paired with tables. The OMEGA fits with the special round fiberglass stackable table or the BONGO table, and offers comfortable seating for up to 4 people. The YOU seat is designed to fit with the aluminum foldable pop-up table, offering seating for up to 5 people. The PUFF seat is a comfortable individual seat for 1 person, offering a patented combination of air and polystyrene for cushioning in a soft version, compared to a budget-priced hard version.

DONUT is a unique round inflatable seat with a very attractive shape that can accommodate up to 6 people. It’s designed to fit our BONGO table in the middle.

All types of seats can be printed in full-color dye sublimation upon demand.

CHILLOUT

For comfort at
your event

AXION | CHILLOUT is a set of inflatable furniture, containing a single chair, a double chair, and a table. Our goal was to make inflatable furniture that is really comfortable, so people can relax there for hours.

On the other hand, we wanted to meet the budget limits of clients who are not willing to spend too much on inflatable furniture. And, of course, we focused on bringing a new design to the market. The result of our development is a great combination of all the above.

AXION Chillout is a perfect event solution. It is nice to use just as it is, without additional costs. Those who wish to put branding on it can combine dye sublimation printed "socks" on the back support tube, seat mattresses, or both. The sock is attached with zippers, so a different one may be used for each event. A table may be equipped with an acrylic glass board, UV printed on the bottom side.

DESIGN

Cool and modular inflatables

Are you tired of the classic shapes of inflatables that look old-school and are mostly for only one purpose?

The DESIGN edition of inflatables is ready for you! These original and modern inflatables use our top-quality bases known from our AXION Shape series, so any new inflatable sock can be zipped in a matter of minutes.

You can customize your event without the necessity to purchase and store unnecessary products. Such a great idea, isn't it?

Go for the DESIGN edition of inflatables in premium quality!

CLASSIC

Standard inflatables in all your favorite shapes

The CLASSIC edition of inflatables provides a wide range of the most popular shapes, like different arches, tubes, bottles, cans, and other objects in many sizes.

Their technical solution with a permanent blower enables the creation of all these products in large dimensions, compared to the limited sizes of pneumatic objects.

SPECIAL

enlargement of
your product

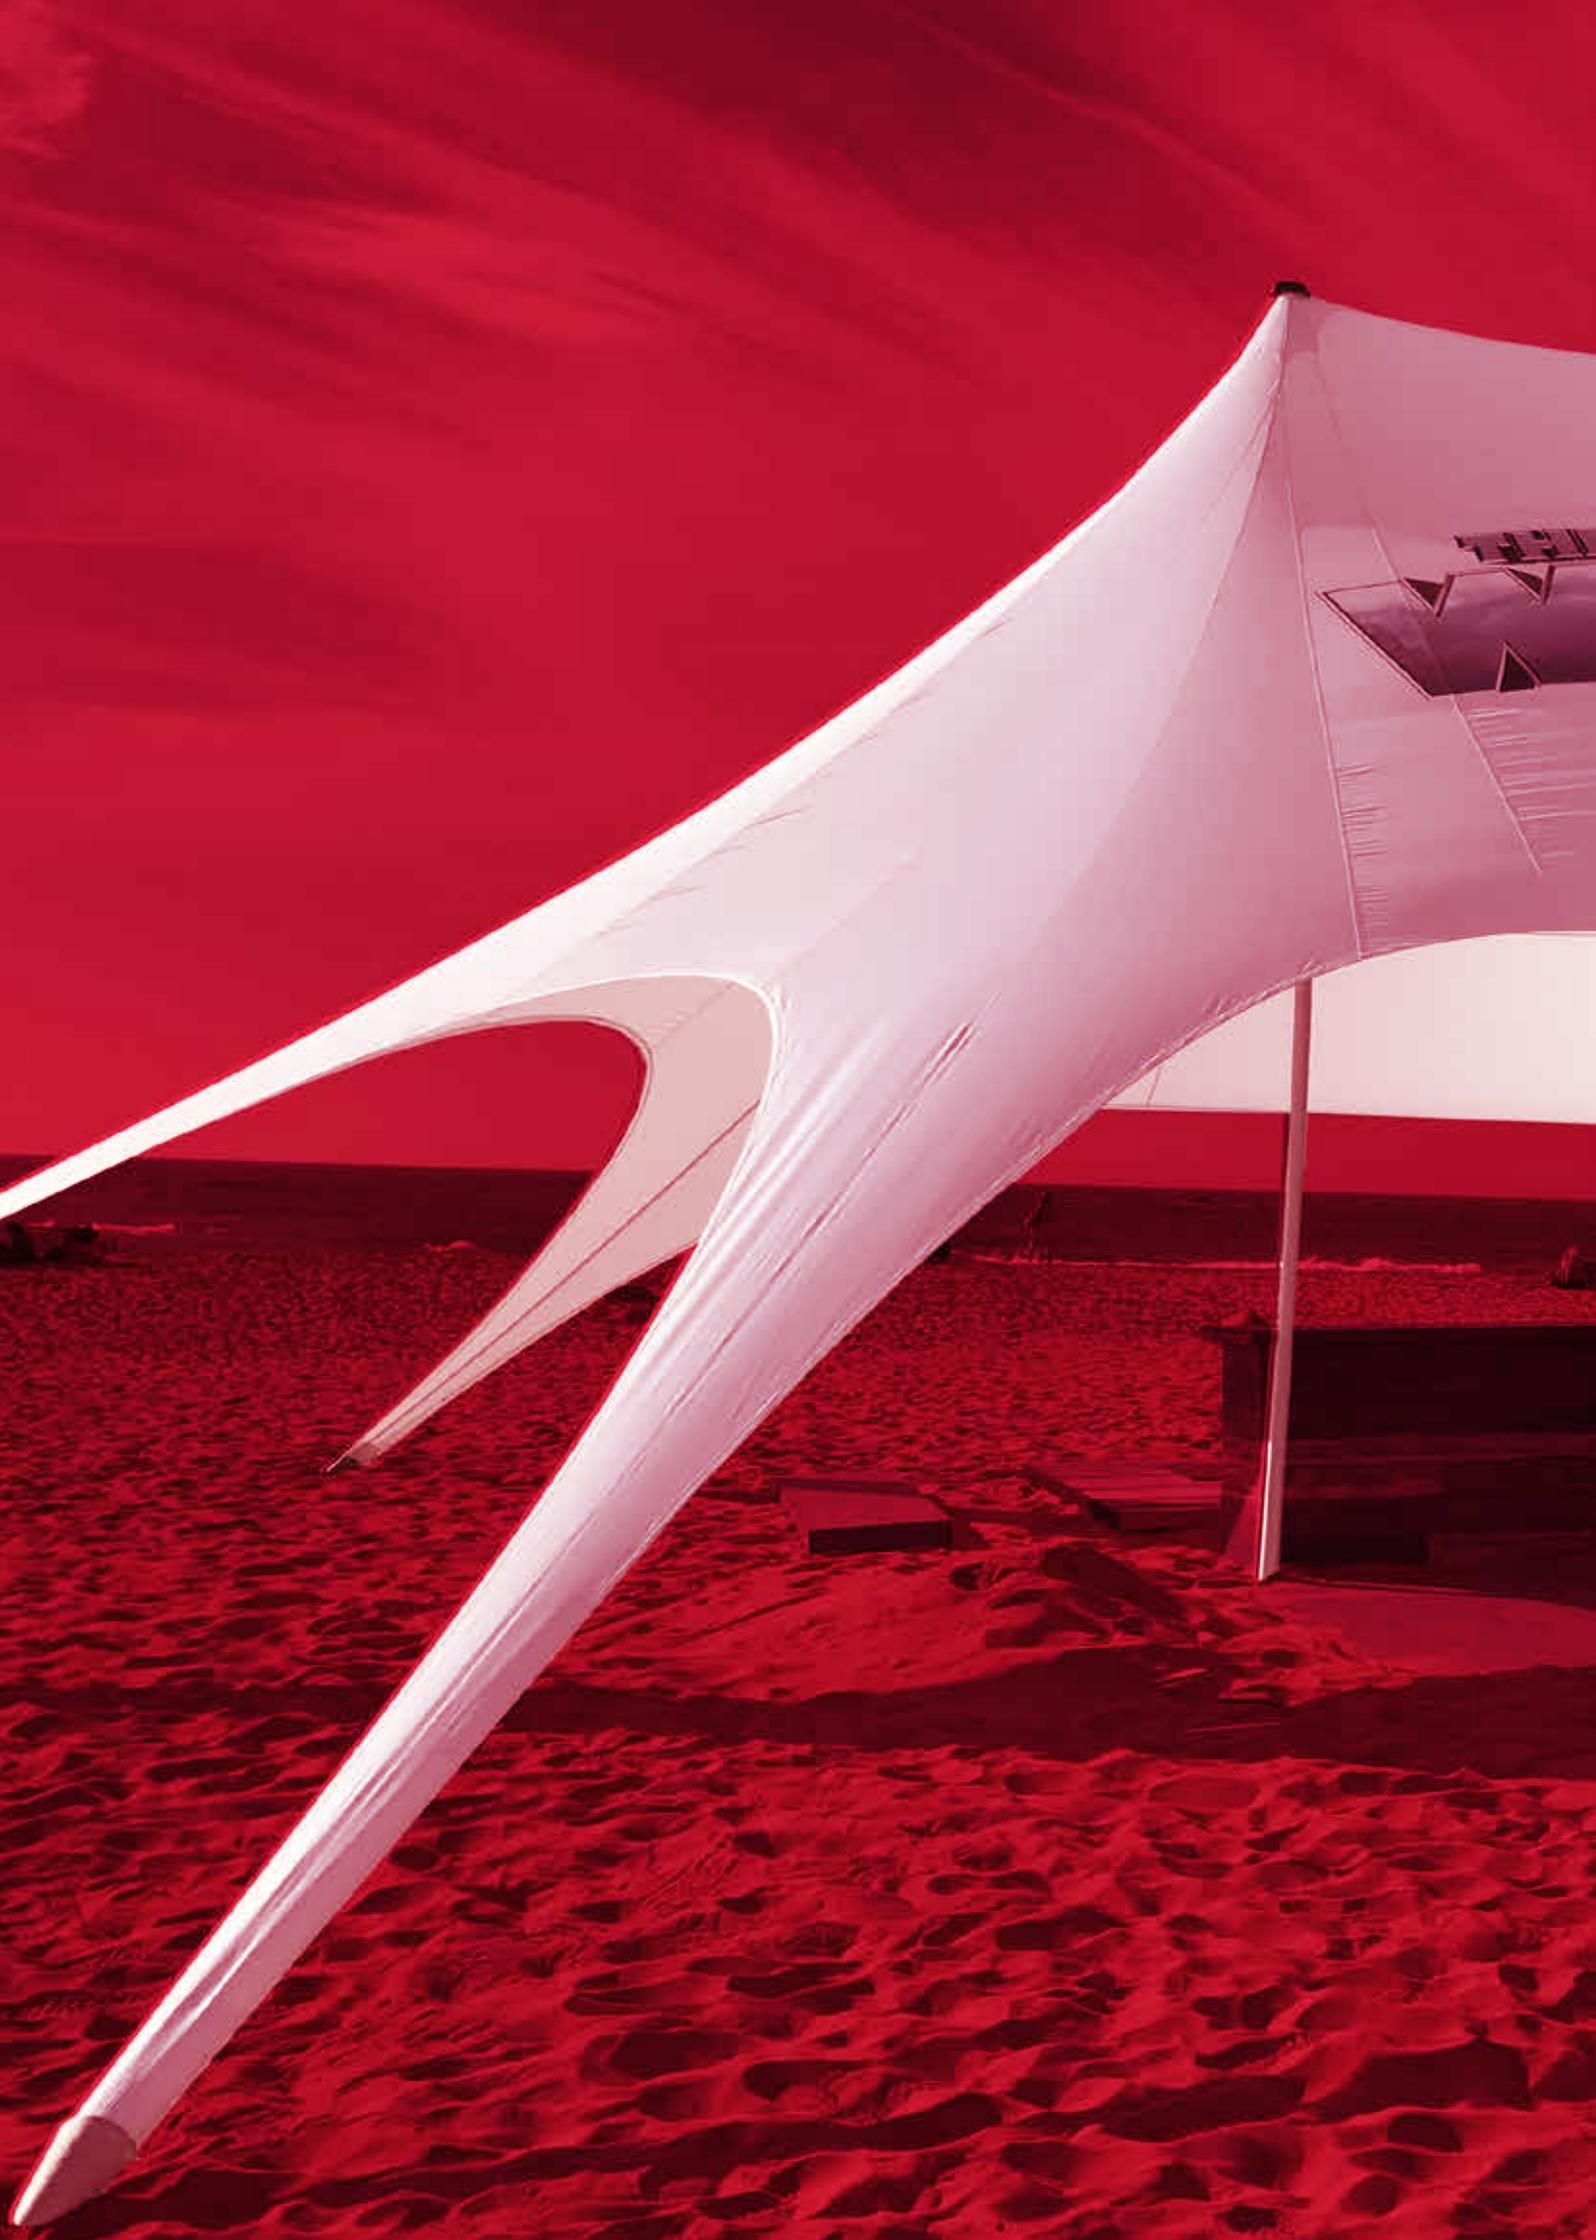

Some kind of events require a very unique marketing way. This could be strongly supported by our SPECIAL inflatables. You know it, after checking of many possibilities you finally find that the best way how to present your unique product is to create the special enlargement eye catcher exactly based on your imagination.

SPECIAL inflatables provides the wide range with almost unlimited shapes and designs in many sizes from small duplicates to big enlargements to promote your business.

**ORIGINAL TENTS, DOMES AND SHELTERS
LET US TENTIFY YOUR EVENT**

TEPEE

Simple and effective covering of the event area

Star tent - TEPEE

We offer you high-quality and stylish design with our star tent. It will make your event look nice and representative with full print graphics. The star tent is designed to offer you a visually appealing and representative tent for your event. The star tent is developed and designed to meet all safety standards worldwide.

Eye-catcher

We offer star tents with a diameter of up to 17m and a height of 6m, which are impossible to miss in a crowd. Fully brandable with DYE-sublimation printing and no color limits, this tent is visible everywhere. Our Tepee creates an attractive star look and sets the right atmosphere for any kind of event. Perfectly suitable for festivals, trade shows, weddings, corporate or sports events.

Hard Surface Solution

The star shade is frequently used for events with soft ground. We have developed a solution for hard surface ground. We offer a steel plate with a rubber screw, compatible with an aluminum foot. The design and final look, with the new decorative aluminum foot, make the Tepee more compact and help hide the top of the pegs visible from the ground.

Transport

Our star tents are designed to cover surfaces up to 70m². The TEPEE is developed and designed for customers who are looking for a representative and fully brandable product. It is easy to pack into a bag and transport in a personal car, with a unique collapsible central pole and hook to stretch the roof into the right shape. Setup time is up to 30 minutes, from car to fully built star shade.

Instant pop-up shelter for events and promotions

POP UP TENT

We manufacture pop-up canopy tents with high-quality hexanal aluminum frames for promotions and events. Made from high-quality, printable waterproof fabrics (500D), these tents are ready to be fully customized and supported by accessories such as side walls, half walls, visors, or rain gutters to connect two tents together.

FULL SUBLIMATION PRINT

We offer full print on pop-up shelters, including the roof, walls, and half walls. Dye-Sublimation printing changes the look of the tent into a high-quality marketing product. Your pop-up tent can be printed without limits to meet customer needs.

TRANSPORT VS. SET UP TIME

Our pop-up tents include a trolley bag, which perfectly fits the size of the frame and custom top. The bag makes it easy and comfortable to transport the tent in your car. The fabric used for pop-up tents has unique patterns and fits perfectly with the frame. Taking the trolley bag from your car and setting up your tent takes only a few minutes, and your tent is ready to use.

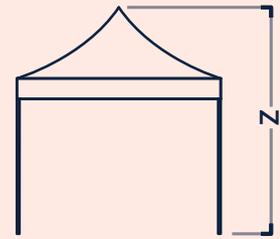

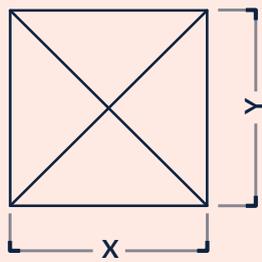

QUALITY VS. PRICE

We offer a budget-friendly solution to TENTIFY your event. Supplied with a durable aluminum hexanal frame and covered with high-quality 500D waterproof fabric, our walls are zippered together for durability and protection. Delivered with spikes to anchor them to soft ground and ropes for anchoring in case of windy conditions.

HARD SURFACE SOLUTION

For those who want to use pop up canopy tents on concrete or hard surfaces, we offer optional accessories such as ballast bags or 20kg steel plates.

QUICK Model	Width "Y" (m/ft)	Length "X" (m/ft)	Height "Z" (m/ft)

STRETCH

Multipurpose
shade for all
kinds of events

STRETCH TENT

If you are looking for how to TENT-ify your event with some fresh designs, you are on the right page. Just a couple of minutes away from purchasing your own tent for your events. Stretch tents are the best solution for creating memorable events with an absolutely unique atmosphere. They are currently very popular for covering areas on uneven surfaces for weddings, festivals, parties, and company events. Every time you TENT-ify your event, it will have a new shape, ensuring it's never boring. There are endless options for stretch tent setups.

MADE WITH LOVE

We offer stretch tents completely made in-house. All development, design, and manufacturing happen under one roof in our new 2970 m² manufacturing facility. Stretch tents branded with the TENTIFY logo can withstand winds up to 100 km/h.

LIGHTWEIGHT FABRICS

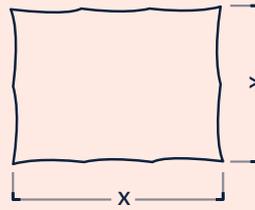

Using the most innovative fabrics on the market, we ensure all safety standards are met and followed. For smaller sizes (up to 8.5 × 12 m), we use lightweight Stretchflex 300 g/m². Larger sizes are made from stronger Formatex, a durable and resistant fabric for covering bigger areas (from 100 m²).

TRANSPORTABLE IN CARS

One of the key features of our stretch tent is easy transport. Compared to “party” or frame tents, our stretch tents are transportable in a personal car. We offer two sizes of collapsible poles. With these collapsible poles, you are not limited to using a VAN or small truck for transport because they are packed in a 1.4 m long bag for easy carrying in a personal car.

FAST AND EASY SETUP

Putting up a stretch tent is not difficult. A big advantage is that there are no limits on how to set it up. Every way is the correct way, and you can create a new shape for your tent anytime. Setting up the largest size (15 × 20 m) takes about an hour for 3 people. Sizes up to 8 × 10 m can be set up by one person in about 30 minutes. In no time, you'll have a stylish covering for your event or party.

Model	Width "Y" (m)	Length "X" (m)	Height "Z" (m)
STRETCH 30	6,2 / (20'4")	4,8 / (15'9")	3,5 / (11'6")
STRETCH 50	8,3 / (27'3")	6 / (19'8")	3,5 / (11'6")
STRETCH 80	8 / (26'3")	10 / (32'10")	3,5 / (11'6")
STRETCH 110	8,7 / (28'7")	12,6 / (41'4")	3,7 / (12'2")
STRETCH 150	10,1 / (33'1")	14,9 / (48'11")	3,7 / (12'2")
STRETCH 220	13 / (42'8")	17 / (55'9")	4,5 / (14'9")
STRETCH 300	15,7 / (51'6")	19,1 / (62'8")	4,5 / (14'9")

BEACHFLAGS

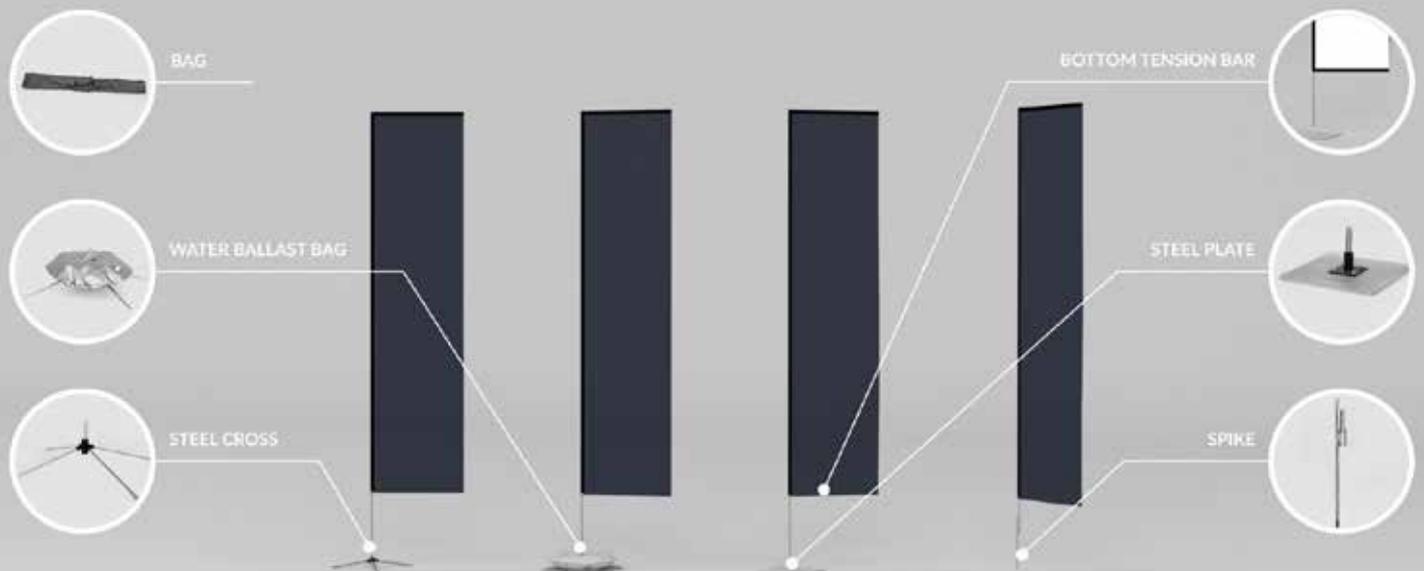

Available in three popular shapes

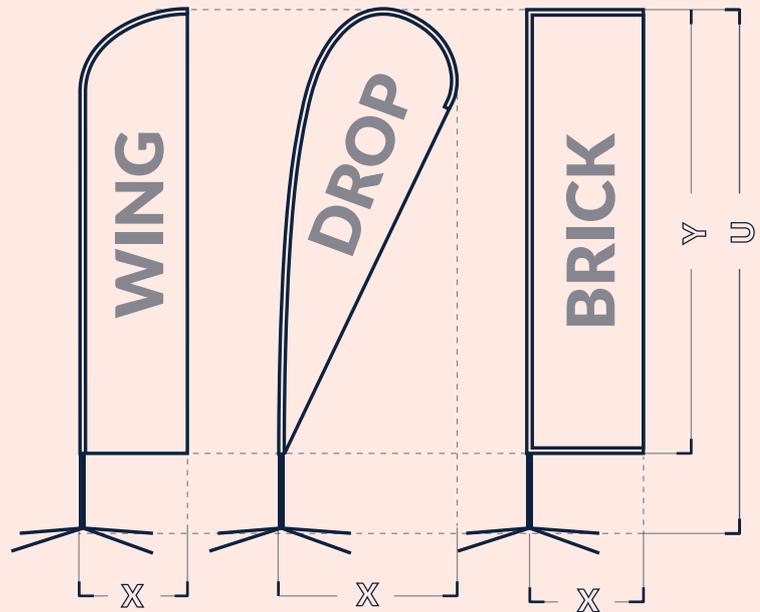

AXION | BEACHFLAG

Do not forget to order beach flags to complete your event set. Our beach flags are available in three popular shapes: Wing, Drop, or Brick. Each shape has three available sizes. For the flags, we use high-density FR-rated taffeta fabric, which is printed by the indirect sublimation method (paper transfer). Therefore, our beach flags do not release waste pigments in the first rain.

Due to the use of high-quality inks, the printing is shiny and UV-resistant. The fiberglass rods are of the best quality, crack-resistant in both high and low temperatures. A bottom tension bar is available as a useful accessory for those wishing to achieve perfectly shaped beach flags. Different bottom ends are available for different surfaces. You can choose a spike, steel plate, or steel cross with a water ballast bag.

	WING S	WING M	WING L	DROP S	DROP M	DROP L	BRICK S	BRICK M	BRICK L
Width "X" (cm)	70 (2'4")	70 (2'4")	70 (2'4")	80 (2'7")	100 (3'3")	125 (4'1")	70 (2'4")	70 (2'4")	70 (2'4")

Height "Y" (cm)	250 (8'2")	360 (11'10")	475 (15'7")	240 (7'10")	365 (12'0")	450 (14'9")	210 (6'11")	295 (9'8")	420 (13'9")

BANNERS

Sponsor
promotion at
sports events

BARRIER BANNERS

Easy sponsor promotion at sports events. The barrier banner is made of high-quality polyester fabric, printed by dye sublimation. The fabric is perforated, allowing wind to pass through. Therefore, the risk of the barrier falling over is significantly minimized. The banner is supplied in 50m rolls, with a width of 70cm. Applying our fence banner is very easy – just fix it through the perforation using plastic cable ties.
